IRSC

INTERSTATE ROOF SYSTEMS CONSULTANTS, INC.

LUNCH N' LEARN SERIES

EXPERT ADVICE AT NO COST TO YOU

TOPICS:

Roofing Maintenance 101

Learn how to extend your roof assets beyond their expected service life; saving you time and money in the long run. This session will help you understand how to manage these costs and implement your own roof maintenance program.

Water Entry Investigations

Discover the proper techniques to identify recurring water leaks in the building envelope and how to address problematic leaks the first time. This session will discuss methodology in diagnosing leaks and how to repair leaks for a long-term solution.

Infrared Surveys: Building Envelope and Electrical Systems

Learn how to use infrared surveys to quickly detect moisture of building envelope systems, as well as the use of infrared cameras for electrical system maintenance. This session will show how infrared is used to detect electrical heat or bad connection to prevent equipment failure, power outages or even fire.

Solar Power: Is Your Roof Ready?

Installing solar panels on your building is great for sustainable energy, yet it can cost you more money than it saves if installed improperly. This session will focus on what you need to know about your roof and building envelope before installing solar panel systems by answering four important questions.

Compact Roof Assembly: Apartment Buildings

How to avoid unexpected condensation problems with your roof assembly; what to look for and how to mitigate the risk. This session will focus on showing examples of the do's and don'ts of installing and maintaining apartment building roof assemblies.

In-person or virtual training available. Sessions run between 30 minutes and 1 hour and includes a question and answer session.
